

Website UX Comparison: onlykw.com vs Competitors

How products are displayed, what the homepage and product pages include, and where competitors are ahead

Captured live on 2026-10-08 · iPhone 13 viewport (390×664) in headless Chromium · EN + AR

1. Executive Summary

onlykw.com runs on **Ordable**, a Kuwaiti ordering-menu SaaS ("powered by ordable/" in the footer). It's a client-rendered React app: the server sends an 8.6 KB empty shell and the content appears after the JavaScript loads.

The site works as a **fast single-page order menu**: 8 products, each with an "Add" button, area selection and guest checkout. It doesn't work as a **store that sells**. Every competitor captured gives the shopper more reasons to buy, more information and more ways to spend more.

The 10 biggest gaps, ranked by revenue impact:

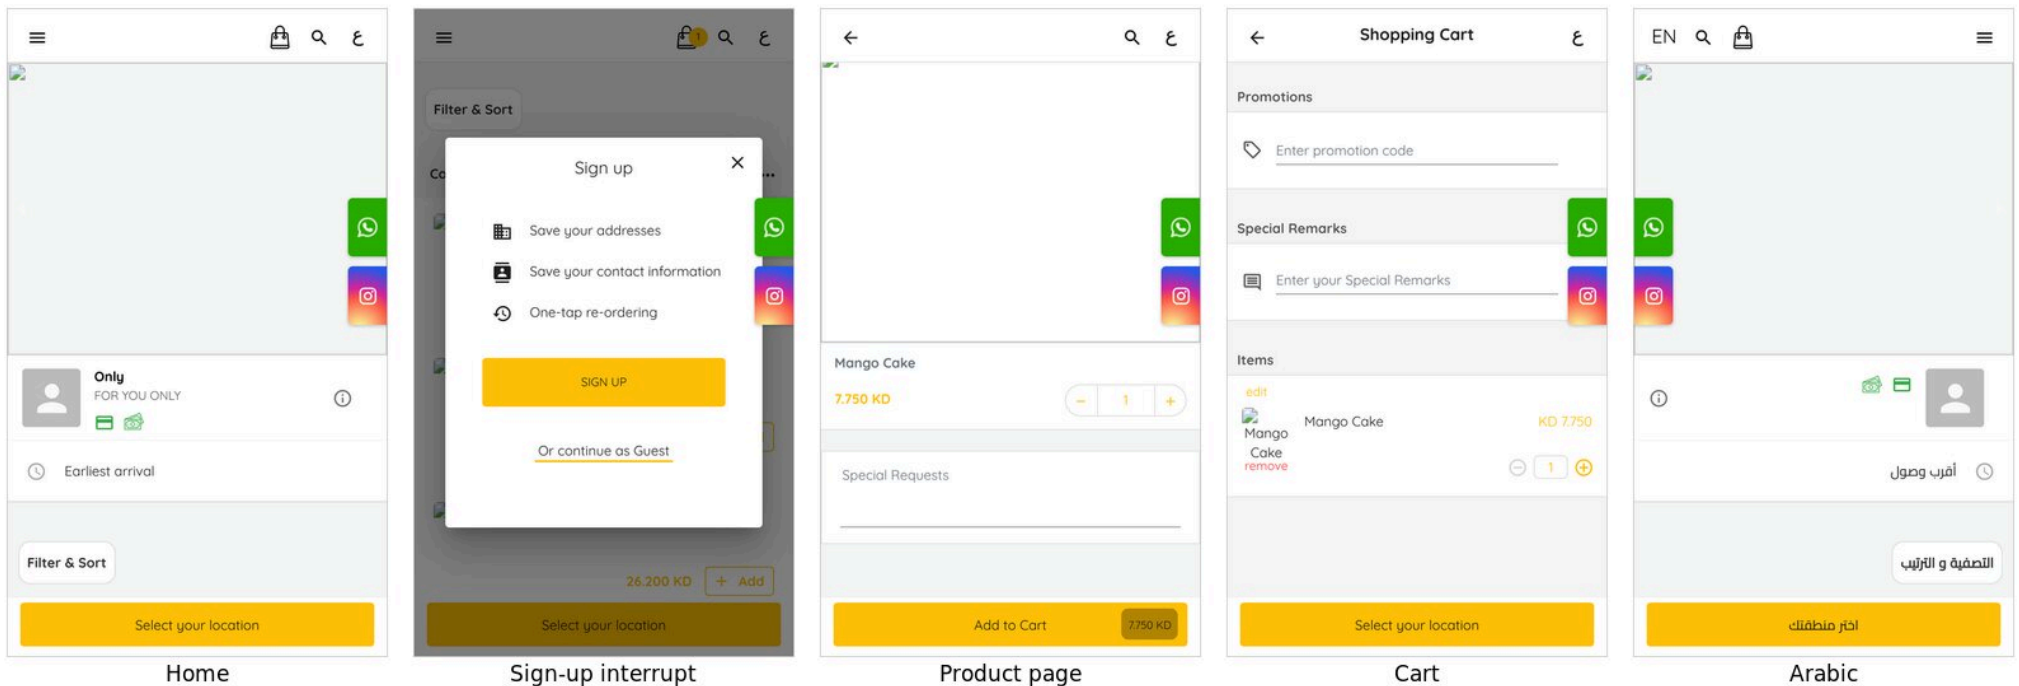

#	Gap	onlykw.com today	Who does it better	Impact
1	No delivery promise anywhere	Only an "Earliest arrival" row; no time, cutoff or fee shown before checkout	Fantastic Chocolate: black bar "🚚 Free Delivery ⌚ Within 90 Minutes · 10:30AM–11:30PM" on every page. Khobz: "Orders after 3:30 PM delivered next day"	● High
2	Product page is nearly empty	Image, name, price, qty, "Special Requests", Add to Cart. No description, servings, ingredients, storage or reviews	Milk Bar: video, 7 media, serves 6–12, 13,417 reviews, storage, nutrition, Q&A. Saadeddin: price incl. VAT, calories, delivery/pickup/secure-pay box	● High
3	No AOV mechanics	No free-delivery threshold, gift-with-purchase, bundle discount or add-ons	Fantastic: free chocolate box over 20 KD. Milk Bar: "Bundle and save up to 10%" progress bar with 1-tap ADD. Salt & Straw: subscribe & save 10%	● High
4	Add-to-cart kicks the shopper back to the homepage	No confirmation, drawer or upsell; only a badge count changes	Mirzam: slide-out drawer with "You may also like" + "Add a gift card". Milk Bar: "Added to cart" toast. Khobz: popup with View cart / Check out	● High
5	Sign-up wall interrupts buying	"Sign up / Or continue as Guest" sheet appears on add-to-cart, cart and checkout	Competitors allow silent guest checkout. Capture happens through an offer popup (Mirzam: 15% off first order)	● Med-High

#	Gap	onlykw.com today	Who does it better	Impact
6	No gifting flow	Free-text "Special Requests" only	Bleems: required delivery date + time, occasion picker (20+ occasions), To / message / From with "Suggested message". Fantastic: "Order Notes or Gift Message" on product page	🟡 Med-High
7	No trust or social proof	No reviews, ratings, press, story or guarantee	Milk Bar: 4.1★ from 13,417 reviews + press quotes. Khobz: Google reviews 4.0 (40+). Saadeddin: "since 1919" heritage	🟡 Med-High
8	No occasion or recipient navigation	Categories are product types only (Combo / Cake / Ice Cream Bites / Cookies)	Saadeddin: "ما هي مناسبتك؟" (occasion tiles) + "يتهدى لمين؟" (recipient tiles: father, mother, friends, colleagues, kids, corporate)	🟡 Medium
9	Weak SEO and link previews	Title "Only", meta description "FOR YOU ONLY"; product content not in the HTML	Fantastic Chocolate: keyword titles ("Belgian Chocolate Gifts & Trays"), blog articles, factory story	🟡 Medium
10	No size ladder	One size per product	Fantastic: 60 / 27-piece variants. Milk Bar: flavour + size. Salt & Straw: pack + delivery frequency	🟡 Medium

2. Method & Caveats

Item	Detail
Sites captured live	onlykw.com, Saadeddin, Fantastic Chocolate, Bleems, Mirzam, Khobz, Milk Bar, Salt & Straw, Magnolia Bakery
Partially captured	Bateel : page loaded but its styling files were blocked, so only structure was read. Crumbi : Next.js app didn't render in the headless browser. Floward : bot protection (403). These three are excluded from the visual comparison.
What was recorded per site	Mobile screenshots, page text and section order, navigation, buttons, theme/platform fingerprint (e.g. <code>Shopify.theme</code>), app scripts, product-page blocks, and add-to-cart behaviour (drawer / popup / redirect)
⚠️ onlykw.com images	onlykw.com's product and banner images are hosted on <code>tapcom-live.ams3.cdn.digitaloceanspaces.com</code> , which this research environment blocks . Your images show as blank boxes in these screenshots. That's a capture limitation, not a fault on your site. Layout, text, prices, buttons and flows were captured fully. To refresh the screenshots with images, add that domain to the environment's allowed list.
Location bias	Captures came from a data-centre IP, so some sites showed geo prompts (e.g. Bateel "Ship to: India", Magnolia location prompt).
Checkout	Walked to the contact-details step only. No orders were placed.

3. onlykw.com Today: Teardown

Images missing in these screenshots because the image CDN was blocked here (see §2).

3.1 Platform & tech

Item	Finding
Platform	Ordable (Kuwaiti ordering SaaS). React + Material-UI single-page app; images on Tapcom/DigitalOcean CDN
Rendering	Client-side. Initial HTML 8.6 KB with no product content. First price text appeared about 3.0 s after navigation on a fast data-centre connection; on 4G inside the Instagram/Snapchat in-app browser it will be slower
Tracking	Google Tag Manager, Meta Pixel, Snap Pixel, TikTok Pixel detected
SEO metadata	<code><title>Only</title></code> , description "FOR YOU ONLY", OG description "Order online directly from Only"
URL pattern	<code>/product/<category>/<slug></code> (e.g. <code>/product/cake/mango-cake</code>), <code>/cart/</code> , <code>/checkout/details</code>
Languages	EN + AR toggle ("ع"); Arabic layout mirrors correctly

3.2 Homepage: what it includes (top → bottom)

1. **Header:** ☰ menu · cart bag (with count badge) · search · "ع" language toggle
2. **Banner carousel** (image slides with prev/next arrows)
3. **Brand row:** logo, "Only · FOR YOU ONLY", payment-method icons, ⓘ info
4. **"Earliest arrival"** row (delivery-timing mode)
5. **Filter & Sort** button
6. **Product list**, grouped by category with a list-row layout:
 - **Combo:**
 - Tiramisu cake + Tiramisu bites + Nutella cookies, **26.400 KD**
 - Mango cake + Mango ice-cream bites + Nutella cookies, **22.200 KD**
 - Tiramisu cake + Mango cake + Nutella cookies, **26.200 KD**
 - **Cake:**
 - Mango Cake "Serves 7-9 people", **7.750 KD**
 - Tiramisu Cake "Best Tiramisu in Town!", **11.950 KD**
 - **Ice Cream Bites:** Mango / Tiramisu / Cocoa, each "20 pieces ... covered with white/milk chocolate", **7.950 KD**
 - **Cookies:** Nutella Cookies 12 pcs, **6.500 KD**
7. **Floating buttons:** WhatsApp, Instagram
8. **Sticky bottom bar:** "Select your location" (yellow)
9. Footer: "powered by ordable/"

Missing on the homepage:

- delivery promise or hours
- free-delivery threshold
- best-sellers or "new" badges
- occasions
- reviews
- brand story
- newsletter or WhatsApp capture
- policies
- corporate/catering entry point

3.3 Product display (listing cards)

- **Format:** single-column **list rows**, like a restaurant menu: small thumbnail · name · one-line descriptor · price · Add button.
- **Strengths:**

- Fast to scan
- One-tap add from the listing
- Servings shown for the Mango Cake ("Serves 7-9 people")
- Piece count shown for the bites
- **Weaknesses:**
 - Small images, while competitors use large 1:1 or portrait tiles
 - No badges (best seller, new, ✂ fast delivery, sale)
 - No ratings
 - Servings shown inconsistently (only on one cake)
 - No price per person
 - Combos named as raw ingredient lists ("Tiramisu cake+Tiramisu bites+Nutella cookies") instead of named boxes
 - **Combos give no saving.** Each combo costs exactly the sum of its items:
 - $11.950 + 7.950 + 6.500 = \mathbf{26.400\ KD}$
 - $7.750 + 7.950 + 6.500 = \mathbf{22.200\ KD}$
 - $11.950 + 7.750 + 6.500 = \mathbf{26.200\ KD}$
 - So there is no incentive to choose a combo over single items

3.5 Cart & checkout flow

1. **Add to Cart** → redirected back to the homepage. Badge shows "1". No confirmation, drawer or upsell.
2. **Cart page** (/cart/):
 - Promotions (promo code field)
 - Special Remarks
 - Items (edit / remove / qty)
 - Sticky "Select your location"
3. **Location sheet:** governorate list (Farwaniya, Kuwait City, Ahmadi, Mubarak Al-Kabeer, Hawalli, Jahra) → area list (e.g. 40+ areas under Kuwait City).
4. **Checkout** (/checkout/details): "Contact Information" behind the same Sign up / Guest sheet.

Missing:

- free-delivery progress bar
- add-ons / cross-sell
- delivery date & time slot in the cart
- gift toggle / recipient details
- order summary with delivery fee before location
- payment-method reassurance

Read-out: onlykw has **1 of 17** PDP elements fully in place (sticky add-to-cart) and 2 partly (free-text requests, price). Kuwaiti competitors Bleems and Fantastic have 8-10. The biggest misses for a dessert/gift purchase are servings and size, delivery date/time, gift message/occasion, storage and allergen info, and reviews.

What onlykw does well here:

- The **area picker** (governorate → area) is Kuwait-native and clean.
- **Promo code in the cart** is visible early.
- **Guest checkout** is possible.

8. Gap Analysis: Where Competitors Are Better, and How to Close It

Effort key:

- **O** = doable on Ordable today (settings / content / banners)
- **S** = needs the Shopify rebuild (see `SHOPIFY_STORE_BLUEPRINT.md`)

#	Area	Competitor advantage (how they do it)	What onlykw should do	Effort
1	Delivery promise	Fantastic: fixed bar "Free Delivery · Within 90 Minutes · 10:30AM-11:30PM". Khobz: bilingual cutoff. Saadeddin: "fast delivery" chip + "ready in 15 min" pickup.	Add a top banner / first carousel slide: "دقيقة · من ١٠ ص X توصيل خلال / Delivered in X min · 10AM-11PM ", plus the same-day cutoff. Repeat on product descriptions.	O now · S (live countdown)
2	PDP content	Milk Bar / Mirzam / Saadeddin: description, servings, ingredients & allergens, storage, calories.	Fill the Ordable product description for every SKU (AR + EN), using the structure below.	O now
3	Images & video	Milk Bar 7 media incl. video; Fantastic 6-image gallery; Salt & Straw 17.	Upload 4-6 images per product (hero, cross-section, serving, box, scale) if Ordable supports galleries. Lead with the strongest ad-creative stills. Video on PDP needs the Shopify build.	O (images) · S (video)
4	AOV threshold	Fantastic: free chocolate box > 20 KD. Mirzam: free shipping > 500 AED. Milk Bar: \$100+.	Set free delivery over 15 KD (Ordable delivery-fee rules per area/min order, if available) and announce it in the banner. Gift-with-purchase at 25 KD via a promo.	O (fee rules) · S (progress bar)

#	Area	Competitor advantage (how they do it)	What onlykw should do	Effort
5	Bundles	Milk Bar "Bundle and save up to 10%", Khobz named boxes, Salt & Straw packs.	Today's combos cost exactly the sum of their items (0% saving). Rename them as named boxes with a real 5-10% saving shown , e.g. "صندوق الديوانية / Diwaniya Box · serves 15 · 26.400 24.500 KD ". Add 1-2 combos around Mango Bites.	O now
6	Add-to-cart behaviour	Mirzam drawer with recs; Milk Bar toast; Khobz popup.	Ordable redirects to home. Ask Ordable whether a "stay on page + toast" option exists. Otherwise this needs the Shopify drawer (UpCart).	S
7	Sign-up wall	Competitors: silent guest checkout + incentive capture (Mirzam 15% popup).	Turn off the sign-up prompt on add/cart if Ordable allows, or reword it as an offer ("Sign up & get free delivery on your first order").	O (setting)
8	Gifting flow	Bleems: occasion + To/Message/From + suggested messages + required date/time. Fantastic: gift message field.	Rename "Special Requests" to رسالة الهدية / Gift message & special requests with placeholder examples. Add a "Gift card + candles" add-on product (0.500–1.000 KD). Full recipient flow needs Shopify.	O now · S (full flow)
9	Scheduling	Fantastic: date + time picker in cart. Bleems: required on PDP. Magnolia: fulfilment-split nav.	Make scheduled delivery (date + slot) visible next to "Earliest arrival" on the homepage, if Ordable supports scheduling. Mention it in the banner: "اطلب الحين أو جدول طلبك".	O (if supported) · S
10	Social proof	Milk Bar 13,417 reviews; Khobz Google 4.0; Saadeddin reviews tab.	Add a reviews/testimonial carousel slide (screenshots of real WhatsApp/IG feedback) + Google rating. Product-level reviews need Shopify (Judge.me).	O (banner) · S
11	Occasion & recipient nav	Saadeddin occasion + recipient tiles. Fantastic "Occasions" menu.	Create categories by occasion in Ordable (Gatherings, Birthday, Guests / بمعة , Ramadan) alongside product categories.	O now
12	Badges	Khobz "Sale", Bleems "Same Day Delivery", Milk Bar "Best Seller".	Use name prefixes / descriptors for "الأكثر مبيعاً ★ / Best seller", "جديد / New" if Ordable has no badge feature.	O
13	Size ladder	Fantastic 60 / 27 pcs; Milk Bar 6"/10".	Add Small / Large cake options and 10 / 20 / 40-piece bites as Ordable product options with servings in the option label.	O (options)
14	SEO & sharing	Fantastic keyword titles + blog.	Change store title/description in Ordable settings to keyword-rich AR/EN text ("Only	كيكة مانجو وحلويات توصيل الكويت"). Full SEO (server-rendered pages, blog, schema) needs Shopify.
15	Capture & retention	Mirzam 15% popup + WhatsApp. Magnolia birthday 10%. Saadeddin points. Salt & Straw rewards.	Short-term: WhatsApp broadcast opt-in via the floating WhatsApp button + post-order WhatsApp. Long-term: Klaviyo + loyalty (blueprint \$5).	O (manual) · S
16	Corporate / catering	Saadeddin corporate gifts banner, Fantastic tray filling, Magnolia catering nav.	Add a "Corporate & Gatherings orders" category or banner linking to WhatsApp with prefilled text.	O now

#	Area	Competitor advantage (how they do it)	What onlykw should do	Effort
17	Mixed-fulfilment rules	Magnolia blocks mixing local and national items.	Needed once frozen / pre-order items exist alongside same-day (blueprint \$3.3 lead-time resolver).	S

9. Prioritised Action List

This week (no re-platforming, Ordable settings & content)

1. Delivery-promise banner + cutoff (AR/EN) as the first carousel slide.
2. Full PDP descriptions with servings, layers, storage and allergens for all 8 SKUs.
3. Rename combos as named boxes with "serves X" and a real 5-10% saving (today they cost the full sum of their items).
4. Rename "Special Requests" → "Gift message & special requests".
5. Occasion categories: Gatherings / Birthday / Guests / Corporate.
6. SEO title & description update; disable or reword the sign-up interrupt.
7. 4-6 images per product; add the strongest ad visuals.

Next 30 days

8. Free-delivery threshold (≈15 KD) via delivery-fee rules + banner.
9. Size options (Small / Large cake; 10 / 20 / 40 bites).
10. Gift add-ons as products (card, candles, gift bag).
11. Reviews slide (Google rating + customer screenshots).

12. Scheduled-delivery visibility (if Ordable supports it).

With the Shopify build (`SHOPIFY_STORE_BLUEPRINT.md`)

13. Cart drawer + progress bar + 1-tap add-ons (Mirzam / Milk Bar pattern).

14. PDP with video, gallery, servings picker, storage badges, reviews (Milk Bar / Saadeddin pattern).

15. Gift flow with occasion, To/From, suggested messages, date/slot (Bleems pattern).

16. Occasion + recipient homepage modules (Saadeddin pattern); drops and loyalty (Salt & Straw / Crumbl pattern).

17. Server-rendered SEO pages + blog (Fantastic Chocolate pattern).
